Contents

I. Publications

D. S. and M. K. Lee: Economic Designs of Single and Double Screening Procedures 95

W. Bischoff and W. Fieger: On Least Favourable Two Point Priors and Minimax Estimators Under Absolute Error Loss 283

H. Dette: A New Interpretation of Optimality for E-Optimal Designs in Linear Regression Models 37

N. Ebrahimi: A Semiparametric Technique to Estimate Survival Probabilities 339

K. Engel and S. Gierer: Optimal Designs for Models with Block-Block Resp. Treatment-Treatment Correlations 349

T. Flak and W. Schmid: An Outlier Test for Linear Processes 299

R. Hafner: Construction of Minimax-Tests for Bounded Families of Probability-Densities 1

L. Heinrich: Asymptotic Properties of Minimum Contrast Estimators for Parameters of Boolean Models 67

J. Eichenauer-Herrmann: Equidistribution Properties of Nonlinear Congruential Pseudorandom Numbers 333

J. Eichenauer-Herrmann: The Lattice Structure of Nonlinear Congruential Pseudorandom Numbers 115

S. Kageyama and H. Setoya: Bounds on the Efficiency of the Residual Design of Extended BIB Designs 191

U. Kamps and L. Mattner: An Identity for Expectations of Functions of Order Statistics 361

K. R. Lee and C. H. Kapadia: Combined Unbiased Estimators Based on Q-Reduced Model 137

C. H. Lin and S. Sukhatme: Two-Sample Rank Tests with Truncated Populations 149

E. P. Liski and G. Trenkler: MSE-Improvement of the Least Squares Estimator by Dropping Variables 263

G. S. Mudholkar, M. P. McDermott and J. Aumont: Testing Homogeneity of Ordered Variances 271

N. Mukhopadhyay, S. Chattopadhyay and S. K. Sahu: Further Developments in Estimation of the Largest Mean of K Normal Populations 173

N. Mukhopadhyay and A. R. Padmanabhan: A Note on Three-Stage Confidence Intervals for the Difference of Locations: The Exponential Case 121

M. S. Mulekar/L. J. Young: A Fixed Sample Size Selection Procedure for Negative Binomial Populations 25

L. Pardo, D. Morales, M. Salicrú and M. L. Menéndez: The φ-Divergence Statistic in Bivariate Multinomial Populations Including Stratification 223

J. Pusz: A Characterization of the Binomial and Negative Binomial Distribution by Regression of Products 237

V. Rohatgi and K. Selvavel: Some Statistical Problems in the Presence of an Outlier When Sampling from Truncation Parameter Densities 211

E. F. Schuster: Accuracy of Proportion Estimators: a Simple Rule 325
W. Stute, W. G. Manteiga and M. P. Quindimil:
Bootstrap Based Goodness-Of-Fit-Tests 243
Y. Takada: Uniformly Most Accurate Equivariant Prediction Limit 51
G. Weihrather: Testing a Linear Regression Model Against
Nonparametric Alternatives 367
R. van de Ven and N. C. Weber: Bounds for the Median of the
Negative Binomial Distribution 185
D. R. Wingo: Maximum Likelihood Methods for Fitting the
Burr Type XII Distribution to Multiply (Progressively) Censored
Life Test Data 203

II. Book Reviews

R. V. Ambartzumian: Factorization Calculus and Geometric
Probability *(J. Mecke)* 321
W. J. Anderson (Ed.): Continuous Time Markov Chains: An
Applications-Oriented Approach *(A. D. Barbour)* 202
A. D. Barbour/L. Holst/S. Janson: Poisson Approximation *(D. Pfeifer)* 190
H. Bauer: Wahrscheinlichkeitstheorie *(U. Krengel)* 323
A. Benveniste/M. Metivier/P. Priouret: Adaptive Algorithms
and Stochastic Approximations *(G. Pflug)* 380
I. M. Bomze: A Functional Analytic Approach to Statistical
Experiments *(D. Mussmann)* 322
A. Brandt/P. Franken/B. Lisek: Stationary Stochastic Models
(S. T. Rachev) 130
C. Constantinescu: Maß und Integral *(B. Anger)* 184
D. Feldman/M. Fox: Probability. The Mathematics of
Uncertainty *(W. Uhlmann)* 360
S. Fienberg/J. Olkin (Eds.): Log Linear Models by Ronald
Christensen *(Th. Santner)* 319
V. L. Girko: Theory of Random Determinants *(A. Prekopa)* 282
J. C. Gittins: Multi-Armed Bandit Allocation Indices *(D. A. Berry)* 134
E. Godehardt: Graphs as Structural Models *(H. H. Bock)* 65
P. Hackl (Ed.): Statistical Analysis and Forecasting of
Economic Structural Change *(L. D. Broemeling)* 381
W. Haerdle (Ed.): Applied Nonparametric Regression *(E. Mammen)* 136
T. P. Hutchinson/C. D. Lai: Continuous Bivariate
Distributions, Emphasising Applications *(E. Eberle)* 114
N. L. Johnson/S. Kotz/X. Wu: Inspection Errors for Attributes
in Quality Control. Monographs on Statistics and Applied
Probability 44 *(B. Arnold)* 36
H. Kunita: Stochastic Flows and Stochastic Differential
Equations *(S. Watanabe)* 383
Le Cam Lucien/Lo Yang Grace: Asymptotics in Statistics –
Some Basic Concepts *(L. Birgé)* 257
A. L. Lee: U-Statistics, Theory and Practice. Statistics:
Textbooks and Monographs *(M. Denker)* 366
L. Ljung/G. Pflug/W. Walk: Stochastic Approximation and
Optimization of Random Systems *(L. Györfi)* 62

K. V. Mardia: (Ed.): The Art of Statistical Science. A Tribute to G. S. Watson *(K. Schmidt-Koenig)* 22
Ch. E. Minder/G. U. H. Seeber (Eds.): Multivariate Modelle; Medizinische Informatik, Biometrie und Epidemiologie *(H. Riedwyl)* 236
E. S. Pearson: "Student" A Statistical Biography of William Sealy Gosset *(M. S. Barlett)* 129
J. Pfanzagl: Elementare Wahrscheinlichkeitsrechnung *(H. Heyer)* 387
J. Pfanzagl: Estimation in Semiparametric Models *(P. J. Bickel)* 24
B. L. Rozovskii: Stochastic Evolution Systems *(E. Dettweiler)* 261
M. Schäl: Markoffsche Entscheidungsprozesse *(K. Hinderer)* 385
E. Torgersen: Comparison of Statistical Experiments *(E. Siebert)* 259
S. M. Veres: Structure Selection of Stochastic Dynamic Systems *(M. Arató)* 148
A. D. Wentzell: Limit Theorems of Large Deviations for Markov Stochastic Processes *(E. Dettweiler)* 132
D. A. Williams: Probability with Martingales *(H. Heyer)* 270
